First regression

```
library(readr)
library(plm)
```

```
## Loading required package: Formula
```

```
df <- read_csv("CDS.csv")
```

```
## Parsed with column specification:
```

```
## cols(
##   ID = col_character(),
##   TIME = col_character(),
##   CDS = col_double(),
##   FX = col_double(),
##   RESERVE = col_double(),
##   SM = col_double(),
##   Mkt = col_double(),
##   Trsy = col_double(),
##   HY = col_double(),
##   `Eq Prem` = col_double(),
```
